Index of Abstracts

Volume 3 (1982)

Abdelkader, Mostafa A. *Exact solutions for a realistic mass-spring system with a singular control force*, 140. *A generalized mapping of outer space into a hollow earth—Geocosmos*, 218. *Exact solutions for second-order nonautonomous equations of Bernoulli type*, 262. *A nonautonomous generalization of van der Pol's equation with nonlinear control*, 295. *Exact solutions for a second-order nonlinear, nonautonomous differential equation*, 395. *A boundary value problem for a nonlinear generalization of a hypergeometric equation*, 536. *A nonlinear generalization of a Bessel equation related to a Duffing equation*, 597.

Abeles, Francine F. *A unified system of proportional representation*, 180.

Abian, Alexander. *A lucid proof of the fundamental theorem of algebra*, 135. *Speeding up or slowing down the rotation of the earth*, 269. *Unique determination of any harmonic function from its values given on the points of two convergent sequences*, 274.

Abikoff, William. *Quaternions and the bounded model for hyperbolic 3-space* (Erratum), 219.

Ablowitz, Mark J. and **Fokas, Athanassios J.** *On a linearization of the Korteweg-de Vries & Painlevé II equations*, 61.

Abramovich, S. See **Strelits, Sh.**

Abrams, Gene D. *Morita equivalence for rings with local units*, 33.

Acker, Andrew F. *Convex solutions of a free boundary problem involving torsional rigidity and the stress function* (Preliminary report), 396. *An interior free-boundary problem with convex solutions* (Preliminary report), 536.

Acsel, J. and **Wagner, C.** *Allocation problems on arbitrary intervals*, 380.

Addington, Susan L. *Families of abelian varieties arising from quaternion algebras*, 580.

Adleman, Leonard M. *Results on cryptanalysis of the Graham-Shamir public key cryptosystem*, 483.

Adolphson, A. and **Sperber, S.** *Twisted Kloosterman sums and p-adic Bessel functions* (Preliminary report), 225.

Adu, David I. *CM-homomorphisms of closed binary relations* (Preliminary report), 39.

Aftabisadeh, A. Reza. *Bounded solutions for some gradient type systems* (Preliminary report), 55.

Ahmed, Shafique. *On the zeros of orthogonal polynomials*, 339.

Ahn, Hyun Joon. *Second order eigenvalue problems with boundary conditions dependent on the eigenvalue parameter*, 56.

Ahuja, O. P. *The influence of the second coefficient on spiral-like and the Robertson functions*, 534. *Certain generalizations of the Robertson functions*, 596.

Aisenman, Michael. *Stochastic geometry in statistical mechanics and field theory*, 518.

Akbulut, Selman. *A fake 4-manifold*, 514.

Akin, Kaan U. *Schur complexes and natural free resolutions* (Preliminary report), 29.

Al-Daffa, Ali A. and **Stroyls, John J.** *Quadrature and cubature in medieval Near Eastern mathematics* (Preliminary report), 221.

Alber, Hans-Dieter. *An inequality for the reduced wave operator and applications to geometrical optics*, 119.

Alex, Leo J. *Simple groups and a Diophantine equation*, 330.

Alexander, James C. *On the deRham invariant of fibered manifolds*, 453.

Alexander, Joyce M. *A consistency measure for the Saaty analytic hierarchy: Northern Ireland application*, 380.

Alexanderson, Gerald L. and **Wetzel, John E.** *On a problem of Fourier* (Preliminary report), 361.

Alexiades, Vasili. *On binary alloy solidification* (Preliminary report), 61.

Ali, M. Masoom, Umbach, Dale and **Ehsanes Saleh, A. K. Md.** *Small sample quantile estimation of the exponential distribution using optimal spacings*, 115.

Aliprantis, C. D. and **Burkinshaw, O.** *Dunford-Pettis operators on Banach lattices*, 86.

Allard, William K. *On the structure of the family of minimal submanifolds of a sphere* (Preliminary report), 541.

Alligood, Kathleen T. and **Yorke, James A.** *Virtual periods and global Hopf bifurcation* (Preliminary report), 171.

Almgren, F. J., Jr. *Multiple valued functions and minimal surfaces* (Preliminary report), 446.

Alperin, J. L. *Characters in blocks with cyclic defect groups*, 464.

Alspach, D. E., Matheson, A. and **Rosenblatt, J. M.** *Projections onto translation invariant subspaces of $L_1(G)$* (Preliminary report), 353.

Altman, Miecsyslaw. *Contractors and fixed points*, 357.

Alvis, Dean. *Ratios of dual degrees*, 166.

Amar, D., Fournier, I., Germa, A. and **Haggkvist, R.** *Covering of vertices of a simple graph with given connectivity and stability number*, 254.

Amick, Charles J. *Nonlinear elliptic eigenvalue problems in an infinite-strip: Bifurcation and asymptotic bifurcation*, 502.

Amundson, Neal R. *Diffusion and reaction in carbon burning*, 496.

Anacker, Steven E. *Graph reconstruction*, 6. *Reconstruction of separable graphs with relatively small branches*, 284.

Ancel, Fredric D. *Freedman's approximation theorem*, 510.

Anderson, Douglas R. and **Pedersen, Erik K.** *Semifree topological actions of finite groups on spheres*, 477.

Anderson, Greg W. *Arithmetic applications of some results on ordinary differential equations*, 172. *The motivic interpretation of the generalized Jacobi Sum Hecke characters*, 416.

Anderson, Marlow E. *Partially ordered semigroups with an abundance of principal idempotents*, 18.

Anderson, Michael T. *Complete area-minimizing hypersurfaces in non-compact manifolds*, 449.

Andrews, George E. *Iterations of additive number theory and statistical mechanics* (Preliminary report), 3.

Mock theta functions and Ramanujan's "lost" notebook, 224. *Partitions and Szegö's 1926 paper on orthogonal polynomials and theta functions*, 341.

Andrews, George E. and **Bressoud, David M.** *A constructive proof of the q-analog of Pfaff-Saalschutz*, 414.

Andrews, Kevin T. *The Radon-Nikodym property for the space of operators*, 76.

Andrus, Jan F. *Convergence and accuracy properties of the method of quasilinearization*, 479.

Anellis, Irving H. *Some theorems for Boolean groups*, 36. *Extension of a Boolean group*, 256. *Quasipotent Boolean Z-groups*, 287. *Structure of quasipotent boolean Z-groups*, 329. *Some theorems for Boolean groups*, 394. *The divisible torsion-free abelian group has a model in the infinitary universal algebra* Ω, 592.

Anick, David J. *Non-commutative graded algebras and their Hilbert series*, 34.

Anshel, Michael M. *HNN groups, Petri nets and complexity theory*, 181.

Antman, Stuart S. *The influence of elasticity on analysis: modern developments*, 481.

Antonelli, Peter and **Kasarinoff, Nicholas.** *Starfish predation of a growing coral reef*, 181.

Anyanwu, Donatus U. *Uniform asymptotic solutions of second order linear ordinary differential equations with singular points*, 246.

Appling, William D. L. *Bounded finitely additive set functions and integrability preservation*, 134.

Archideacon, Dan. *Face colorings of embedded graphs* (Preliminary report), 8.

Arkin, Joseph, Smith, Paul and **Straus, E. G.** *Cyclic orthogonal k-tuples of latin k-cubes*, 313.

Arlinghaus, Sandra L. *Antipodal graphs* (Preliminary report), 123.

Arlinghaus, William C. *Non-standard minimal graphs with given abelian 3-group*, 9.

Aronson, D. G. *Stabilization of solutions of nonlinear diffusion problems*, 567.

Arsove, Maynard and **Leutwiler, Heins.** *Extreme points of convex sets of potentials*, 236. *Excessive elements in harmonic semigroups*, 582.

Aschbacher, Michael. *Presheaves on Tits geometries*, 554.

Ash, Avner. *Ghost classes* (Preliminary report), 421.

Ash, Chris and **Millar, Terrence.** *Persistently finite, persistently arithmetic theories* (Preliminary report), 2.

Ash, J. Marshall. *Sums of three primes and the generalized Riemann hypothesis* (Preliminary report), 23.

Ash, J. M., Jones, R. L. and **Saffari, B.** *Concentrating an exponential sum on a subset of the torus*, 439.

Ash, Peter F. and **Bolker, Ethan D.** *Dirichlet tessellations*, 89.

Ashton, Gareth J. *Banach resolution spaces and Ringrose algebras*, 588.

Ashton, Gareth J. and **Saeks, Richard.** *A Nyquist criterion for invertibility in a nest algebra*, 583.

Askey, Richard A. *Some integrals of Ramanujan and extensions, and why we care about them* (Preliminary report), 237. *Orthogonal polynomials and continued fractions*, 340. *Sieved Jacobi polynomials* (Preliminary report), 431.

Asperti, Antonio C. *Surfaces with constant nonzero normal curvature* (Preliminary report), 451.

Atalla, Robert E. *Ergodic theory of contractions on* $C(X)$, 85.

Atkin, A. O. L. *Ramanujan's modular intuition*, 221.

Atkinson, Bruce W. *Optional times of a Markov process* (Preliminary report), 113.

Aubert, J. and **Schneider, B.** *Décomposition de la somme cartésienne d'un cycle et de l'union de deux cycles hamiltoniens en cycles hamiltoniens*, 254.

Auchmuty, Giles. *Dual variational principles for nonlinear elliptic boundary value problems*, 473.

Aull, Charles. *Extending discrete families of zero sets*, 368.

Auslander, L., Tolimieri, R. and **Winograd, S.** *Generalized special functions Wigner transform* (Preliminary report), 432.

Avis, David *Extremal properties in combinatorial geometry*, 361.

Axler, Sheldon. *Toeplitz operators on the circle–A survey of the last five years*, 83. *Multipliers of Bergman spaces*, 335.

Ayel, J. and **Favaron, O.** *The helms are graceful*, 253.

Ayyaswamy, S. K. and **Ramakrishnan, P. V.** *Equality of dimensions of left, right invariant means* (Preliminary report), 205.

Azarnia, Nasanin and **Wright, J. D. Maitland.** *Positive operators on operator algebras*, 84.

Azpeitia, Alfonso G. *Improved linear duality and multiplier theorems*, 121.

Baartmans, A. and **Shrikhande, Mohan.** *Designs with no three mutually disjoint blocks* (Preliminary report), 4.

Babai, Lasslo. *Lovasz' lattice algorithm with* 2^n *applications–a brief survey*, 483. *The Barany-Furedi protocol: How to deal cards over a telephone*, 483.

Bachman, George. *Lattice repleteness and some of its applications to topology*, 294. *On general lattice repleteness and completeness*, 394.

Baclawski, Kenneth. *Lexicographic straightening algorithms*, 9. *A combinatorial algorithm for computing intertwining numbers over* $SU(n)$ (Preliminary report), 423.

Baernstein, Albert, II. *Curves satisfying the chord-arc conditions*, 44. *Problems about integral means of derivatives of univalent functions* (Preliminary report), 233.

Baernstein, Albert, II and **Sawyer, Eric T.** *Embedding theorems for* $H^p(R^n)$, 568.

Baesa, Ricardo. *Quadratic forms under semi local transcendental extension* (Preliminary report), 27.

Bagley, R. W. and **Yang, J. S.** *Topological groups with small invariant neighborhoods* (Preliminary report), 40.

Bailey, T. and **Cowles, J.** *Cluster definition by optimization of simple measures* (Preliminary report), 217.

Baily, Walter L., Jr. *Arithmetic groups commensurable with the Hilbert Modular Group* (Preliminary report), 224.

Baird, Bridget B. *Maximal inverse subsemigroups of* $S(X)$ (Preliminary report), 36.

Bakelman, Ilya J. *Boundary value problems for elliptic Monge-Ampère equations and reconstruction of hypersurfaces by their Gaussian curvature* (Preliminary report), 471.

Baker, George A., Jr. *Invariance properties in Hermite-Padé approximation theory.*, 347.

Baker, John M. *Reflexivity of operator spaces*, 73.

Baker, Kirby A. *Sufficient conditions for strong shift equivalence*, 490.

Baker, Mark D. *Link complements and the homology of arithmetic subgroups of* $PSL_2(\mathbf{C})$, 447.

Balaban, Tadeusz. *Renormalization and field theory*, 437. *Renormalization and field theory*, 520.

Balasubramanian, R. and **Mossochi, C. J.** *An improved upper bound for* $G(k)$ *in Waring's problem for relatively small* k, 594.

Balasubramanian, R. and **Rammurty, M.** *On Ramanujan's function*, 225.

Ball, B. J. and **Yokura, Shoji.** *Compactifications determined by subsets of* $C^*(X)$. II, 267.

Ball, J. See **Helton, J. William.**

Ball, Michael O. and **Provan, J. Scott.** *Calculating bounds on reachability and connectedness in stochastic networks*, 147.

Ball, Richard N. *ℓ-group completions by means of lattice completions* (Preliminary report), 19.

———. See **Conrad, Paul.**

Balogun, Bola O. *C^*-algebras associated with amalgamated products of groups*, 173.

Bankston, Paul. *Ultrapowers of function rings* (Preliminary report), 99. *Obstacles to duality between classes of relational structures*, 318. *On P-classes of function rings* (Preliminary report), 529. *On partitions of plane sets into simple closed curves* (Preliminary report), 600.

Bannai, Eiichi and **Ito, Tatsuro.** *Toward the classification of* $(P$ *and* $Q)$*-polynomial association schemes* (Preliminary report), 554.

Barab, Jacqueline E. *Behavior as* $m \downarrow 0$ *of solutions of the Cauchy problem for the nonlinear Klein-Gordon equation* (Preliminary report), 199.

Barbut, Erol. See **Brandal, Willy.**

Barbut, Erol and **Brandal, Willy.** *Localizations of torsion theories*, II, 273.

Bardos, Claude. *Analytical approach for the Kelvin Helmholtz instability*, 501.

Barger, Samuel F. *Association hypergraphs* (Preliminary report), 11.

Barnes, John A. and **Harary, Frank.** *Graph theory in network analysis*, 181.

Barnette, David W. *Generating 2-cell embeddings in the torus and projective plane*, 363.

Barnsley, M. F. *The Julia set for* $(Z-\lambda)^2, -\infty < \lambda < \infty$, 457.

Barnsley, M. F., Geronimo, J. S. and **Harrington, A. N.** *Julia sets, invariant measure, and orthogonal polynomials* (Preliminary report), 48. *Relations between orthogonal polynomials associated with a Julia set* (Preliminary report), 199.

Barrar, R. B. and **Loeb, H. L.** *Multivariate approximation*, 202.

Barron, E. N., Evans, Lawrence C. and **Jensen, R.** *Viscosity solutions of Isaacs' equations*, 470.

Barrow, David L. and **Bates, Peter W.** *Bifurcation from collinear solutions to a reaction-diffusion system*, 503.

Bass, Hyman. *The general nonlinear group* (Preliminary report), 158.

Bass, Hyman and **Lubotsky, Alexander.** *Representations and automorphisms of discrete groups*, 37.

Bass, J. *Applications of generalized harmonic analysis*, 458.

Bastero, Jesus. *l^q subspaces of stable p-Banach spaces,* $0 < p \leq 1$, 207. *Non stable norms on* L^1, 401.

Bates, Peter W. See **Barrow, David L.**

Bauer, Douglas. *A Turán type theorem for regular* K_4 *free graphs*, 149.

Baum, Paul. *K homology and Riemann-Roch*, 454.

Baumslag, Gilbert. *Constructive commutative algebra*, 163.

Beale, J. Thomas. *Some existence questions for the equations of surface waves*, 472. *Large-time regularity of viscous surface waves* (Preliminary report), 503.

Beard, J. T. B., Jr. *On matrix fields over* $GF(q,x)$ (Preliminary report), 153.

Bechtell, H. *Finite solvable groups having conjugate splitting systems*, 39.

Beck, Jossef and **Spencer, Joel.** *Integral approximation of linear forms*, 304.

Becker, Eberhard and **Rosenberg, Alex.** *Reduced forms and Witt rings of higher level*, 24.

Beckner, William. *Convexity, convolution and symmetry* (Preliminary report), 441.

Bedford, Eric. *An invariant norm on complex manifolds with application to holomorphic mappings*, 168. *Topics on holomorphic mappings*, 469.

Beem, John and **Ehrlich, Paul.** *Lorentzian distance and manifold topology*, 91.

Beem, John and **Parker, Phillip E.** *Klein-Gordon solvability and the geometry of geodesics*, 93.

Beer, Gerald A. *Dense selections*, 368.

Beineke, Lowell W. and **Hill, Anthony.** *On some properties of Halin graphs* (Preliminary report), 13.

Beissinger, Janet Simpson. *Factorization and enumeration of labelled combinatorial objects*, 317.

Belbas, Stavros. See **Lenhart, Susanne.**

Belbruno, Edward A. *Special families of periodic orbits and their continuation at resonance in the restricted problem*, 57.

Belinfante, Johan G. F. *The BCH formula: Application of special functions to Lie algebras* (Preliminary report), 432.

Bell, Harold. *The fixed point index and the plane fixed point problem* (Preliminary report), 474.

Bell, Murray. *Two Boolean algebras with extreme cellular and compactness properties*, 300.

Bell, Murray, Ginsburg, John and **Todorčević, Stevo.** *Countable spread of* $\exp Y$ *and* λY, 301.

Bell, Steven R. and **Boas, Harold P.** *Regularity of the Bergman projection in weakly pseudoconvex domains*, 169.

Bell, Steven R. and **Catlin, David W.** *Boundary regularity of proper holomorphic mappings*, 168.

Bellenot, Steven F. *The J-sum of Banach spaces* (Preliminary report), 76.

Belley, J.-M. *An integral representation of some linear functionals on* $M(G)$, 250.

Bellin, Gianluigi. *Cut elimination for GL*, 282.

Belna, C. L., Colwell, P. and **Piranian, G.** *The radial behavior of Blaschke products* (Preliminary report), 561.

Bemelmans, Josef. *A variational approach to closed, non-parametric surfaces of prescribed mean curvature*, 248.

Benedetto, John J. *The uncertainty principle and spectral estimation*, 438.

Benedetto, John J., Benke, George and **Evans, Ward R.** *The Wiener Plancherel formula in* $\mathbf{R}^n$ (Preliminary report), 441.

Bengtson, Thomas E. *Bessel functions on* P_n, 237.

Benham, James W. *Representations by ternary quadratic forms* (Preliminary report), 24.

Benke, George. See **Benedetto, John J.**

Bennett, Charles. *Complexity relative to a random oracle*, 483.

Bennett, H. R. and **Lutser, D. J.** *Generalized ordered spaces with capacities* (Preliminary report), 404.

Bens, Herbert and **Zassenhaus, Hans J.** *Computation of Hasse Symbols of a simple hypercomplex system over a global field*, 181.

Bercovici, H. See **Foias, C.**

Berenstein, Carlos A. *On some explicit deconvolution formulas* (Preliminary report), 429.

Berestycki, Henri and **Lasry, Jean-Michel.** *Non linear complex eigen-values and periodic solutions of some conservative systems*, 503.

Berestycki, Henri, Nicolaenko, Basil and **Scheurer, Bruno.** *Traveling wave solutions to systems modeling combustion with multistep chemistry*, 473. *Traveling wave solutions to reaction diffusion systems modeling combustion*, 498.

Berger, Charles A. *A nonstandard dilation theory*, 81.

Berger, Mel S. *Some mathematical problems of VLSI semiconductor design* (Preliminary report), 125. *Creation and breaking of self-duality symmetry* (Preliminary report), 496.

Bergman, George M. *Embedding rings in completed graded rings. 4. Commutative algebras*, 133.

Bermond, J. C., Delorme, C. and **Farhi, G.** *Large graphs with given degree and diameter. II*, III, 253.

Berndt, Bruce C. *Ramanujan's quarterly reports*, 247.

Bernfeld, Stephen R. *A type of measurement for bifurcation* (Preliminary report), 56.

Bernhardt, Christopher. *Periods of periodic points of maps of the circle*, 110.

Bers, Lipman. *Iterates of hyperbolic modular transformations in Teichmüller space*, 590.

Bessis, D., Mekta, M. L. and **Moussa, P.** *Orthogonal polynomials on a family of Cantor sets and the problem of iterations of quadratic mappings*, 217.

Betley, Stanisław, Prsytycki, Josef H. and **Żukowski, Tomasz.** *The non-homeomorphic, hyperbolic 3-manifolds with the same volume* (Preliminary report), 303.

Bevis, Jean H. and **Hall, Frank J.** *Monotonicity of integral matrices*, 31. *Some classes of integral matrices*, 32.

Beyl, F. Rudolf. *Products of acyclic groups* (Preliminary report), 134.

Bhatt, Sandpeep N. See **Leighton, Frank Thomson.**

Bhattacharya, Prabir. *On a class of binary self-dual abelian codes* (Preliminary report), 528.

Bieberich, Richard A. *An extension of Dirichlet's $m + na$ theorem* (Preliminary report), 132.

Biedenharn, Lawrence C. See **Louck, James D.**

Birkenmeir, Gary F. *Exponentiation without associativity*, 393.

Birman, J. S. *Simple curves on surfaces* (Preliminary report), 576.

Bixler, J. Patrick. *An example of the lateral completion of a lattice-ordered group* (Preliminary report), 19.

Blackmore, Denis. *Topological type of complex varieties of codimension greater than one* (Preliminary report), 237.

Blair, Charles E. *Every finite distributive lattice is a set of stable matchings*, 287. *Some pathological linear programs*, 406.

Blair, Douglas H. and **McLean, Richard P.** *Subjective evaluations of n-person games*, 179.

Blair, Robert L. *A cardinal generalization of z-embedding* (Preliminary report), 95.

Blanchard, Paul. *Simple arcs between Morse-Smale diffeomorphisms of surfaces*, 111.

Bland, Robert G. *Linear programming duality, Minty's Lemma, oriented matroids, and signed-set systems*, 149.

Blanton, John D. *Non-orientable manifolds with Morse characteristic 4*, 109.

Blass, Andreas and **Šťedrov, Andrej.** *Freyd's models for the independence of the axiom of choice* (Preliminary report), 524.

Blecksmith, Richard, Brillhart, John and **Gerst, Irving.** *A computer-assisted investigation into Ramanujan pairs* (Preliminary report), 390.

Bleiler, Steven A. *Prime tangles, composite knots, and a conjecture of Lickorish*, 405. *Prime tangles and composite knots*, 574.

Bloch, Spencer J. *Algebraic K-theory*, 291. *Algebraic K-theory and special values of Hasse-Weil L-functions* (Preliminary report), 509.

Block, Louis and **Franke, John E.** *The chain recurrent set for maps of the interval*, 372.

Block, Louis and **Hart, David.** *The bifurcation of periodic orbits of one-dimensional maps*, 452.

Block, Louis, Coven, Ethan M., Mulvey, Irene and **Nitecki, Zbigniew.** *Two theorems on the nonwandering set and homoclinic points of maps of the circle* (Preliminary report), 99.

Blum, Ilya and **Swaminathan, S.** *A note on selection theorems for realcompact spaces*, 100.

Blum, Manuel. *Coin-flipping by telephone*, 484.
